FINISH

What you need	2 players, a counter per player, a die, Maths book and pen / pencil
What to do	<p>Each player chooses a starting square on the top row. The game ends as soon as the first person crosses the finish line. The object of the game is to have the largest total, once the finished line has been crossed.</p> <p>Take turns to roll the die. If you roll:</p> <ul style="list-style-type: none"> * a 1 or 2, you can ONLY move one square across the row in either direction * a 3 or 4, you can move one square diagonally (up or down) * a 5 or 6 means you move one square downward <p>Add the two numbers using a strategy of your choice. Record your total as you go. Ask the other players to check your answers. Who will have the largest score when the finish line is crossed? Good Luck!</p>
