

## 5ST Maths Tasks Monday 14 Nov.

### In pairs:

- Find the mass of 10 different animals (Helpful websites on Cre8tive Learners)
- Choose a range of animals (Heavy and light)
- Create a table with the name of the 10 animals and their mass

An African elephant has the greatest mass of any animal on land. A fully grown male can have a mass of 6500kg or 6.5 tonne.

- Using your table, work out what combination of animals could be equal to the elephant's mass.
- Write these combinations on the whiteboard.
- Including each animal, its mass and the total mass of the animals combined.
